## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 02 August 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of group I in Paper No. 10 is acknowledged.

Claim 14 is grouped with the invention of group II and is thus withdrawn from consideration.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 12-13 are rejected under 35 U.S.C. 102(b) as anticipated by Dubeau et al (*Anticancer Research* 10, 1990).

Dubeau et al disclose a population of fetal ovarian cells that appear to be identical to the presently claimed strains. Consequently, the claimed cells appear to be anticipated by Dubeau. The reference is silent on most of applicant's claimed characteristics (markers, etc) however given its function and the limited characteristics disclosed by the reference, the claimed properties would all seem to be inherent to the reference cells. The burden is on the applicant to prove that the claimed species is indeed novel and not anticipated by prior references. The application, as presented,

Art Unit: 1651

fails to do so. Hence, the claimed cells are deemed to be anticipated by the  
aforementioned references.

The Patent and Trademark Office is not equipped to conduct experimentation in order to determine whether or not Applicants' cells differ and, if so, to what extent, from that discussed in the references. Therefore, with the showing of the references, the burden of establishing novelty by objective evidence is shifted to Applicants.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 12 & 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dubeau et al (as cited above).

The teaches of Dubeau are set forth above. Dubeau does not specifically teach using the cells in an assay or isolating cellular products/components from the cells and using them in assays, etc. However, it would have been obvious at the time the invention was made to use the cells of Dubeau in assays determining the effects of substances on said cells or to isolate and use the cellular products of the cells of Dubeau because these are obvious uses and utilities of isolated cells/cell lines. These methods are notoriously old and well known applications of cells.

Accordingly, the claimed invention was prima facie obvious to one of ordinary skill in the art at the time the invention was made especially in the absence of evidence to the contrary.
